ELSEVIER

Journal of Microbiological Methods 24 (1995/6) 277–278

Journal of Microbiological Methods

Contents of Volume 24

No. 1, November 1995

Editorial v

An assessment of the metabolic activity of starved and vegetative bacteria using two redox dyes
S. Walsh, H.M. Lappin-Scott, H. Stockdale and B.N. Herbert (UK) 1

Suitability of a detergent-sensitive electrode for the determination of the absorption of cationic detergents by fungal conidial cells
S.M.J.C.S. Cabral, M.T. Vasconcelos and J.P.S. Cabral (Portugal) 11

Identification of *Porphyromonas gingivalis* by an ELISA using a cellulose acetate paper point
K. Yasuda, T. Ogawa and H. Shimauchi (Japan) 21

Rapid quantification of staphylococci adhered to titanium surfaces using image analyzed epifluorescence microscopy
Y.H. An, R.J. Friedman, R.A. Draughn, E.A. Smith, J.H. Nicholson and J.F. John (USA) 29

Electrophoretic separation of two unicyanobacterial strains leading to purification
K.A. Palinska and W.E. Krumbein (Germany) 41

Transformation of wild type *Klebsiella pneumoniae* with plasmid DNA by electroporation
S. Fournet-Fayard, B. Joly and C. Forestier (France) 49

Optimization of arbitrarily primed PCR for the identification of bacterial isolates
E.M. Jutras, R.M. Miller and I.L. Pepper (USA) 55

Monitoring of drug effects on cultivable mycobacteria and *Mycobacterium leprae* via the determination of their adenylate energy charges (AEC)
M. Wiese and U. Seydel (Germany) 65

Selective extraction of bacterial macromolecules by temperature-induced phase separation in Triton X-114 solution
R. Kittelberger, M.F. Hansen, F. Hilbink, G.W. de Lisle and A. Cloeckaert (New Zealand, France) 81

A new method for the determination of *Leuconostoc mesenteroides* cell number
H. Lange, F. Plihon, P. Taillandier and J.-P. Riba (France) 93

Erratum 99

No. 2, December 1995

Adherence of *Haemophilus influenzae* to dacron fibres: significance of capsule and biotype
J.J. Harper, J.G. McCormack and M.H. Tilse (Australia) 101

A useful and rapid method to recover bacterial cells from milk samples for microscopic count
A. Fernández-Astorga, M.J. Hijarrubia, B. Lázaro and I. Barcina (Spain) 111

Improved medium for large-scale production of recombinant cholera toxin B subunit for vaccine purposes
J. Osek, M. Lebens and J. Holmgren (Sweden) 117

Comparison of leucine uptake methods and a thymidine incorporation method for measuring bacterial activity in sediment
L. Tuominen (Finland) 125

Comparison of different methods for collection of volatile chemical markers from fungi
T.O. Larsen and J.C. Frisvad (Denmark) 135

The computer-controlled continuous culture of *Escherichia coli* with smooth change of dilution rate (A-stat)
T. Paalme, A. Kahru, R. Elken, K. Vanatalu, K. Tiisma and R. Vilu (Estonia) 145

Monitoring gene expression of *Salmonella* inside mammalian cells: comparison of luciferase and β-galactosidase fusion systems
C.G. Pfeifer and B.B. Finlay (Canada) 155

A simplified immunofluorescence technique for detection of viable cells of *Vibrio cholerae* O1 and O139
M.A.R. Chowdhury, B. Xu, R. Montilla, J.A.K. Hasan, A. Huq and R.R. Colwell (USA) 165

A flowcell for the study of plaque removal and regrowth
R.J. Palmer Jr and D.E. Caldwell (Canada) 171

Rapid discrimination of *Micrococcaceae* species using semiconductor gas sensors
V. Rossi, R. Talon and J.-L. Berdagué (France) 183

A comparison of different methods for the measurement of dissolved gas gradients in waterlogged peat cores
K.L. Thomas, D. Price and D. Lloyd (UK) 191

Announcements 199

No. 3, January 1996

Editorial 201

A rapid method for detection of *Clostridium thermocellum* by field-effect transistor-based immunodetection
V.K. Akimenko, S.M. Khomutov, A.Ya. Obraztsova, S.A. Vishnivetskii, N.A. Chuvilskaya, K.S. Laurinavichus and A.N. Reshetilov (Russia) 203

A spectrofluorimetric method for the determination of total bacterial counts in environmental samples
M.N. Poglazova, I.N. Mitskevich and V.A. Kuzhinovsky (Russia) 211

A kinetic method for estimating the biomass of microbial functional groups in soil
N.S. Panikov and M.V. Sizova (Russia) 219

Comparison of two methods for root nodule bacteria preservation: Lyophilization and liquid nitrogen freezing
V.I. Safronova and N.I. Novikova (Russia) 231

Use of the indirect immunofluorescence test for assaying anaerobic microbial communities
V.K. Akimenko, A.Ya. Obraztsova, N.A. Chuvilskaya, K.S. Laurinavichus and S.A. Vishnivetskii (Russia) 239

Use of colloidal gold to obtain antibiotin antibodies
L.A. Dykman, L.Yu. Matora and V.A. Bogatyrev (Russia) 247

The study of induced antimutagenesis of propionic acid bacteria
L.I. Vorobjeva, E.Yu. Khodjaev and T.A. Cherdinceva (Russia) 249

Method of determination of cellulase activity in soils and in microbial cultures, and its calibration
A.M. Semenov, B.P. Batomunkueva, D.V. Nizovtseva and N.S. Panikov (Russia) 259

Announcements 269
